Regulations Approved

WASHINGTON, D. C., May II.

Regulations making more definite the rights the oil lessees and gas lessees in combination wells in the Company of the sand at 1.420 feet.

On the Texas less lessees were approved by Indian Commencer Sells today.

The regulations of the sand at 1.420 feet in the southeast of the southeast of the southeast of the second well south of the northeast corner of the southeast corner of the southeast of the southeast corner of the southeast of the southeast corner of the southeast of the southeast of the southeast corner of the southeast of the southeast of the southeast of the southeast corner of the southeast of the southeast of the southeast of the

The regulations as adopted permit the oil lessees to use the gas from wells of less than 2,090,000 cubic

Mighty Glad They Are Here

ambulancers are back and are also ing 50 barcels of oil in the Cleveland equally pleased with the fact that a sand. larger portion of the various Liberty | larger portion of the various Liberty loans has been subscribed by themmelves. As one man put it: "I thought
my Liberty loan a poor investment inasmuch as I needed so much money to operate with, and pay taxes, but when I saw the battle-scarred vetarans marching up the street I was gure that I had hardly taken enough."

The Gillexple property offsetting the lease to the west, has a 50-barrel producer in the Cleveland sand drilled in the first part of the week It is fee No. 6 Gillexple in 24-22-10. The sand depth is 1.157 to 1.172 feet.

Old Gas Wells Making Oil

The boys will be back on the leases shortly, and it will be interesting to know how the good old bunk house good results were made yesterday.

The most important of these deepgood results were made yesterday.

The most important of these deepgrowth will taste after the high class
army chow they have been fed on
H is lucky that it is the time of year
when new potatoes are ripe and new
peas and all-gorls of garden truck
and the chances are that it will help
out immens y. There is going to be
no serious trouble of any kind as long
as these soldiers with their high
ideals and full knowledge of the
benefit of a fere country are back
with us again.

A well drilled by a Kansas City
company in the southwest of 11-12company in the southwest of 11-12-

with us again.

The Most Active Spot

on the Map

The liveliest and perhaps most interesting spot on the map is the tountry surrounding Beggs, and the man is lucky who has acreage producing oil in that vicinity, for the reason that they are getting them deeper all the time, not only as did the Wilcox people on the Banks farm in 30-15-11, on top of the lime, but also as the Turman Oil company in 34-15-11 below the lime. The upper sands are producing a lot of oil and gap can be found in most any old place. It is the spot to test out a separator that can save the gas and also put the oil in the tanks.

Late drilling operations include the following: The Producers & Reinfers corporation is due with the No. 1 Ice Johnson in 20-15-15.

east corner of the morthwest quarter is drilling at 400 feet.

The same firm \$0. 2 on the Anna May Stidham farm in 5-15-11 is be-ling shaped for a shot in the Wilcox sand and looks good for a reasonably good well, probably 50 barrels.

Back from Washington

George G. Foster, of the Devonian Oil company: R. C. Sharpe, of the Oklahoma Natural, Judge James A. Veasey, representing the Caster Oil company; Judge Edward Chandler, with the Sinclair Oil company, and Judge Crocker, with Costen & Co. are back from Washington and report that the conference of oil men and gas men with the secretary of the interior, Franklin K. Lane, as referee, was one "good time" and that it is likely to result in an amicable arrangement, the details of which cannot be given out until apwhich cannot be given out until ap-proved by the government.

The questions involved relate to casinghead gasoline and to the size by the gas companies, and while the details are preity well under-stood and the modus operandi which will finally prevail, are known here.

will finally prevail, are known here, it is thought best to leave the matter stand until the government has placed its stamp of approval on the new agreement.

If was simply a matter of the practical operation of leases, and the legal talent soon discovered that it could have no part in the program, and most of the lawyers very willing.

A well drilled by a Kansas City

Late drilling operations include the following: The Producers & Reinfers corporation is due with the No. 1 Joe Johnson in 20-13-12, which is an offeet to the Billingsica gas well east of Beggs.

The same people are drilling in very hard sand at 1,980 feet in 34-15-11. The same people are also reported to have a 1,200-barrel well in their No. 8 Sewell in 2-13-11, but this has not been verified.

H. N. Grels of the Atlantic Petroleum company is drilling at 1,000 feet on the Louisa Bearhead farm in 19-15-11 just-north of the Banks farm, where the big Wilcox well in 30-15-11 is still making 550 barrels.

The Wilcox people have made a location at the center of the east line of the southeast of the northeast of 34-15-11, not far from the big Turman Oil company well, and are lucky enough for get the same kind of producer.

Farther west the Wilcox people are still fushing at the center of the east line of the southeast of 24-15-16. H. F. Wilcox has landed his 53-16 finch casing on his No. 1 test on the Diana. Davis farm in 33-15-11 is still making about 550 barrels and will be going some, as the well has held exactly to its first performance, which was it the northeast of the southeast of the section of No. 2. Bland, which is an still fushing at the center of the east line of the southeast of 24-15-16. H. F. Wilcox has landed his 53-16 finch casing on his No. 1 test on the Diana. Davis farm in 33-15-11 is still making about 550 barrels of the southeast of the southeast of the northeast, which was in the neighborhood of the southeast of the section the No. 2. Timothy, in the same section the No. 2. Timothy, in the same section the No. 2. Timothy, in the southeast, which was completed Saturday, is making 250 barrels, or thereabout, and is southeast of the northeast, which was completed Saturday, is making 250 barrels, or thereabout, and is first performance. It has always looked good to the victer who made the trip to look of the southeast of the northea
